

Trinity

Active Travel Improvement Plans

Government of
JERSEY

What would help with greener, safer, travel in Trinity? – We need your views!

'As a unique community looking to the future we want to play our part in reducing carbon emissions by walking, cycling, and using the bus rather than the car. Our community project board needs to understand what our community feels are the barriers to active travel both in the historic centre of the parish and across the parish. Please have your say about active travel and road safety by taking part.'

- Philip Le Sueur, Connétable

Consultation opens **Monday 4 October**.
